SUMMARY

I am a certified Java Developer with almost 3 years of professional experience in backend development. Passionate about programming, I specialize in building scalable and maintainable applications using Java, Spring, and Hibernate. I am committed to delivering high-quality software solutions while continuously expanding my expertise and adopting emerging technologies. Dedicated to both personal growth and team success, I strive to contribute effectively to every project and organization I am part of.

CARRER

03.2024 - CURRENTLY
10 MONTHS
Trusted Software Services

MID JAVA DEVELOPER

Tech stack: Microservices, Java 11, 17, Spring Boot, Spring Data, Spring Security, JWT, Hibernate, JPA, PostgreSQL, Maven, REST API, Apache Kafka, Junit, Mockito, BitBucket, Docker, XML, JSON, SeaweedFS, Grafana, Kibana, Elasticsearch, Jira, Confluence, Git

- Designing and implementing application functionality extensions according to local requirements.
- Resolving technical issues related to system configuration and operation.
- Designing the architecture of an application for storing and managing XML files.
- Implementing processes for automatic uploading of XML files to the repository.
- Implementing mechanisms for user authentication and authorization.
- Creating systems for managing roles and access levels.
- Designing and managing the database structure for storing XML metadata.
- Implementing processes for extracting metadata from XML files and saving it to the database.
- Designing and implementing advanced filtering and search mechanisms for XML files.
- Creating algorithms for managing the lifecycle of XML files.
- Implementing retention policies and automatic deletion of outdated files.

07.2022 - 03.2024
1 YEAR 9 MONTHS
Billenium

JUNIOR JAVA DEVELOPER

Tech stack: Microservices, Java 8+, Spring Boot, Spring Data, Hibernate, JPA, MySQL, Maven, REST API, Junit, Mockito, Gitlab, Jira, Confluence, Git

A project involving the development of the company's internal documents and employees search engine with a large number of filters. I was responsible for both delivering completely new functionalities and fixing bugs. One of the biggest functionality I was created was to design and implement a search filter profile for the user. In addition, I was responsible for implementing a backend solution for monitoring the status of the application (whether the application is working properly or are there any errors).

EDUCATION

09.2021-04.2022
INFOSHARE ACADEMY

INFOSHARE ACADEMY COURSE - JUNIOR JAVA DEVELOPER

Junior Java Developer course lasting 450h and covering the scope from java basics to advance topic in Spring and Hibernate

09.2016-10.2021

UNIVERSITY OF TECHNOLOGY IN KIELCE

Master degree in civil engineering industry

CERTIFICATES

02.2024   **JAVA SE 8 PROGRAMMER I (1Z0-808)**

12.2024   **JAVA SE 17 DEVELOPER (1Z0-829)**

LANGUAGES

English B2 level

INTERESTS

- football (especially Liverpool F.C)
- hiking
- dart
